

1. Click on the Start Menu and select Settings or the Gear Icon

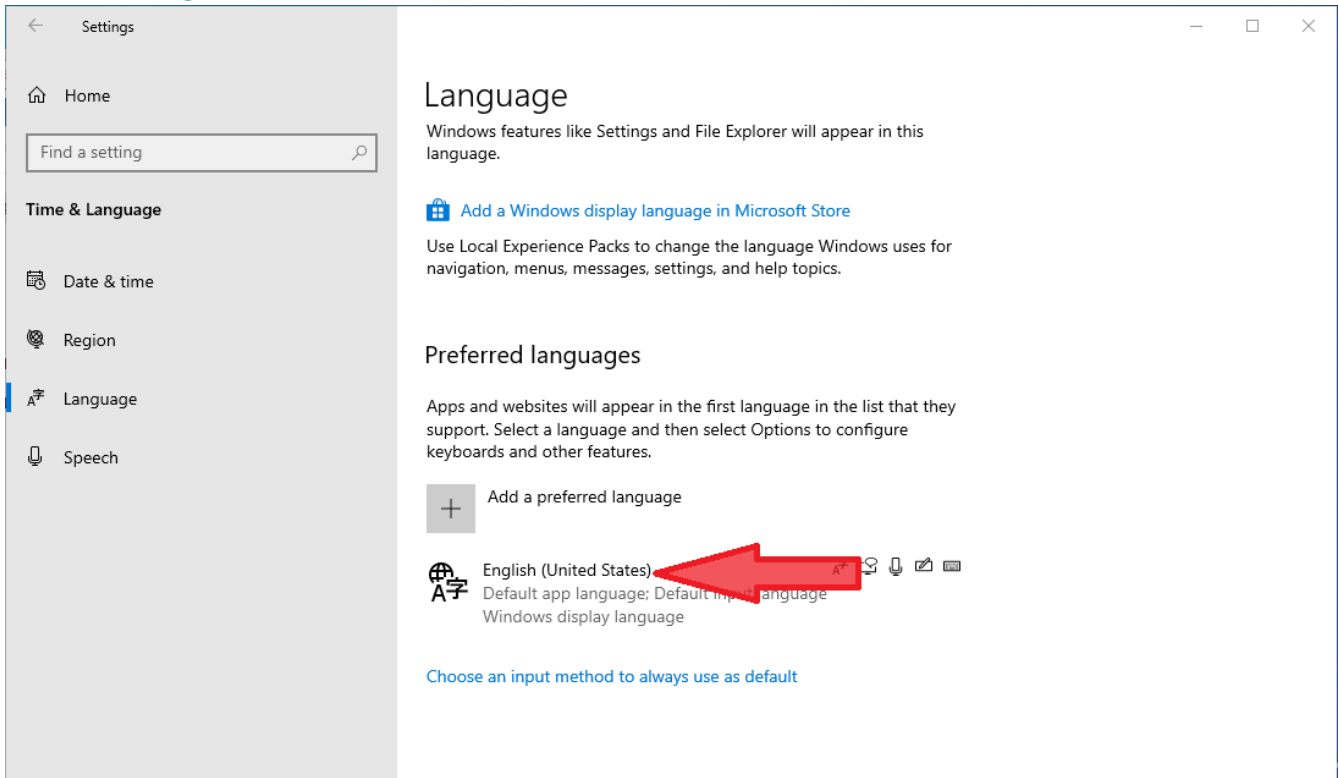

2. Click on Time & Language

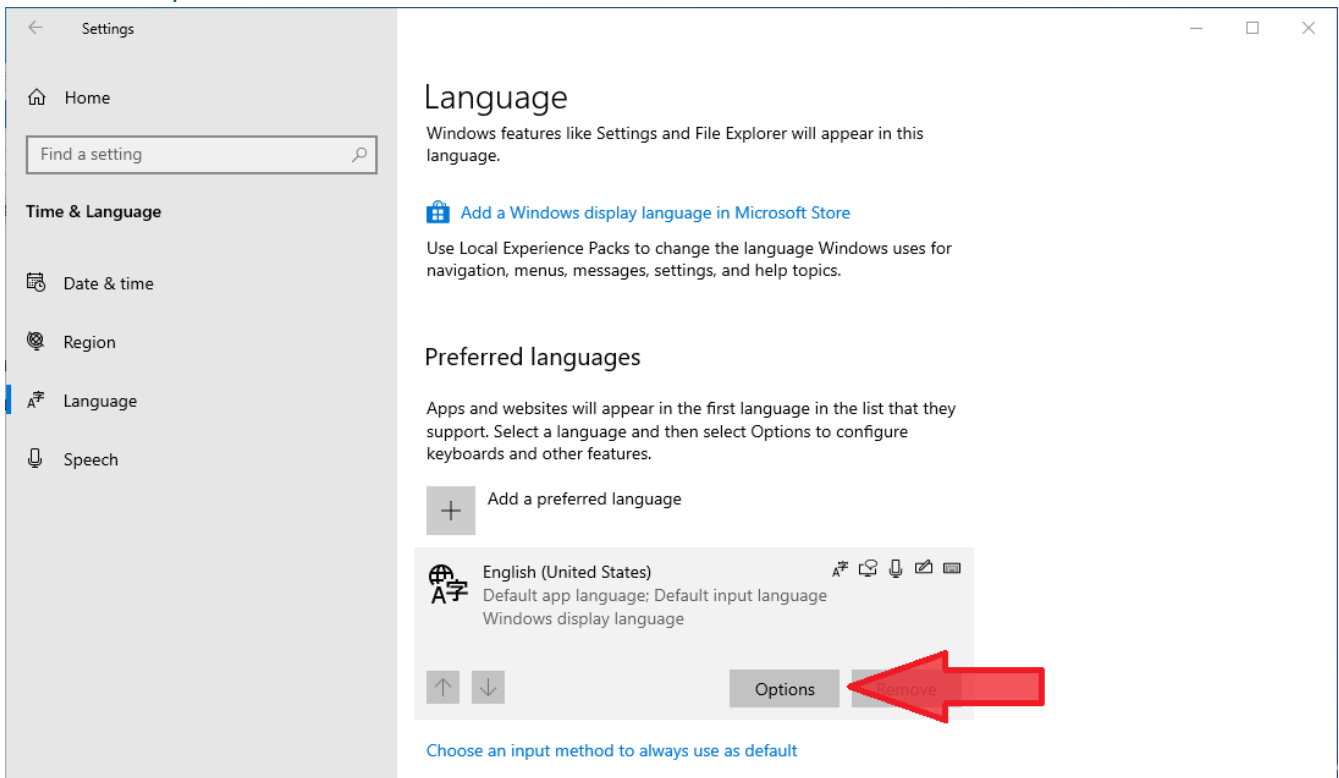

3. Click On Language

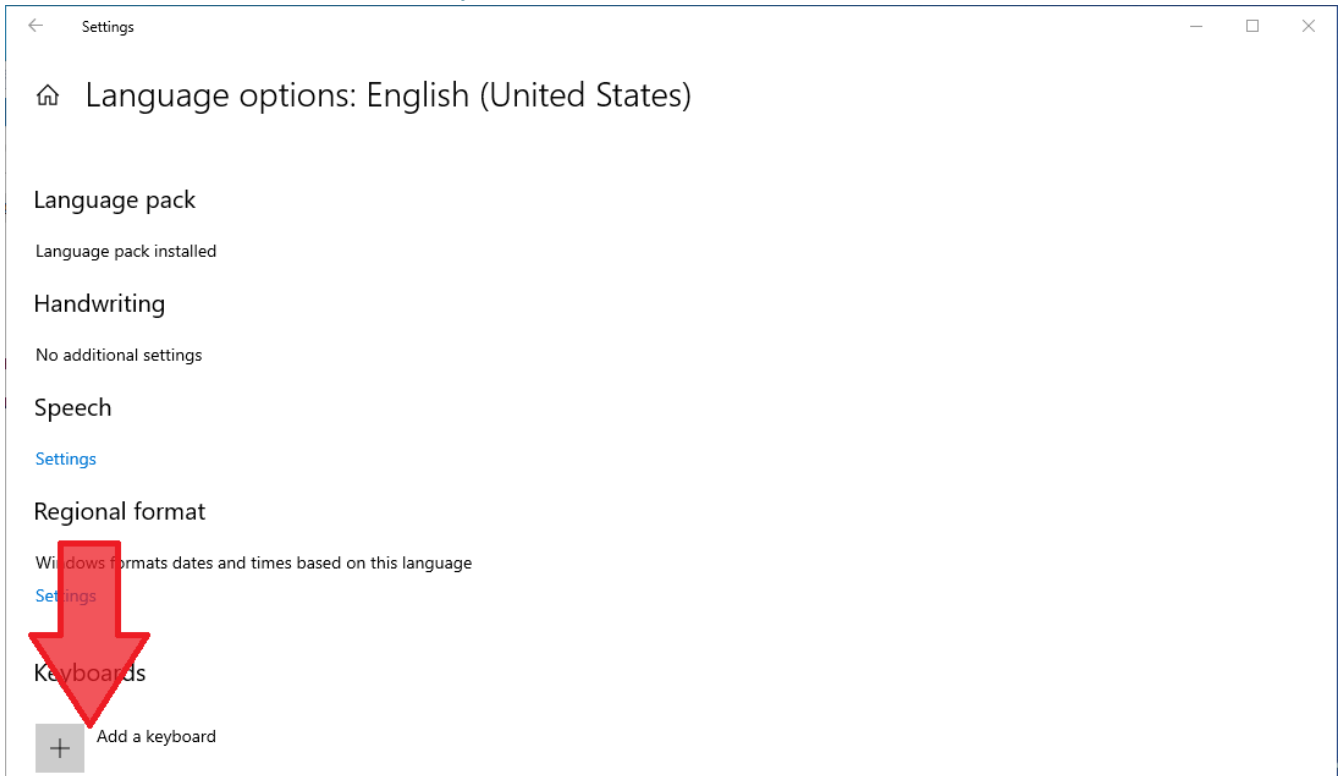

4. Click on English(United States)

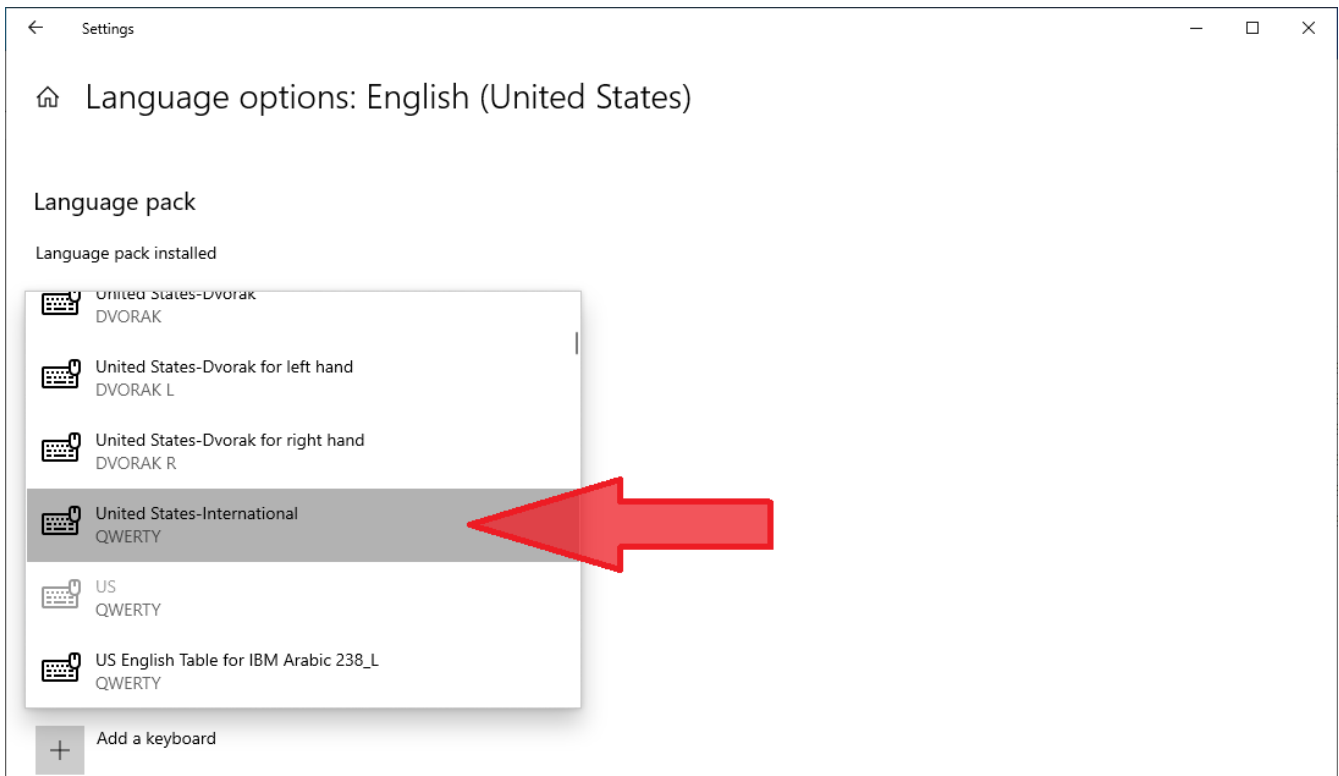

5. Click on Options

6. Scroll down and click on Add Keyboard

7. Scroll down and select United States-International

8. Click on ENG US to the left of the time and date in your computer's system tray and then select the ENG INTL keyboard layout.

Once you have done all of the steps listed above, simply typing normal English characters (such as a or n) while holding down the **Alt key** on the **RIGHT SIDE** of your keyboard will result in their Spanish accented counterparts (such as á or ñ) to be typed instead of the normal characters. You will now be able to type in both Spanish and English while only having to use the **RIGHT Alt key** to add the Spanish accents.
